

## GET CAREER-READY!

Welcome to Gies College of Business. During your time here, I will be your Career Coach. Now that you have made the important decision to add to your skill set with our MS in Technology Management degree, it is also important for you to begin thinking about your end goal: the job you want when you graduate. That is why your job search starts today, and our Career Services team is here to help you.

We have designed an online Career Management Foundations Course to help you begin your job search and develop in-demand professional competencies to set yourself apart in the job market. You will need to complete this course prior to orientation. Please follow the instructions listed in the [New Graduate Student Checklist](#) to access this course.
